

POSITION DESCRIPTION

Position: Financial Analyst

Reports to:	Assistant Director of Reporting and Analysis
FLSA Status:	Exempt
Prepared by:	Diana Morel
Date:	April, 2023
Approved by:	Alex Sawyer

Summary:

SeaCube is a global leader in the intermodal transportation industry, providing companies with best-in-class equipment solutions, technology and customer support to move the world's cargo. We acquire, own, manage and lease containers, primarily on long-term contracts to the world's largest shipping lines. Today, SeaCube is looking well beyond the horizon, building on our strong foundation to deliver new and innovative container and leasing solutions that solve longstanding transportation challenges to help our customers increase efficiencies and gain a competitive advantage.

SeaCube is looking for a highly motivated Financial Analyst. In this role, reporting to the Assistant Director of Reporting & Analysis, you will provide analytic support to the Financial Planning & Analysis team as well as other key stakeholders throughout the organization. Your key responsibilities include creating, analyzing, interpreting and communicating results effectively to both senior management and external clients. You will interact across the organization to obtain fact-based metrics. You will then use the identified metrics to prepare informative reporting dashboards for company use in driving business decisions.

Essential Duties & Responsibilities:

- Prepare monthly managed fleet reporting for Finance and Accounting teams
- Create insightful reporting, analyzing operational and historical data, to identify issues and provide management with transparency to support effective decision making
- Partner with manager, IT staff, and other stakeholders to utilize internal company and external industry information to create meaningful KPI's in Qlik Sense
- Manage annual audit process of managed customer portfolio by preparing and validating data related to revenue, disposals, operating expenses and unit counts
- Assist with month-end close process as needed – perform financial analyses by creating and maintaining financial and operational reports/charts (fleet statistics, inventory, and per diem)
- Ability to troubleshoot data issues and work closely and effectively with manager, and IT department or external consultants to identify and resolve
- Assist with ad-hoc requests for information/analysis related to our owned and managed fleet customers

Qualifications/Skills:

- Strong analytical and problem-solving skills
- Advanced Microsoft Office Skills – Excel, Access, PowerPoint

- Proficient knowledge of preparing charts/dashboards in Qlik Sense
- Familiar with database concepts
- Detail-oriented, ability to multi-task and demonstrate initiative
- Strong communication and interpersonal skills, and intellectual curiosity

Education/Experience:

- Bachelor's Degree in Finance or Accounting
- 3+ years analytical and financial focused work experience
- Experience in the transportation sector is a plus
